

XP1-18RT

XP series

Integrated PLC & HMI, owns the same functions as XC1 series, display area can be touched

Digital input: 10 points/optical couple isolated

Digital output: 8 points/relay

Easy edit, abundant functions LCD display: 192×64 pixel (3.7inh) ; use life up to 500,000 hours

Functional keys up to 26

Delicacy and precise keys

Use the same cable to Compile for HMI and PLC

IP65

Compact configure, save more space

General specifications

Input voltage	DC12V-DC24V
Current Consumption	Less than 10W (TYP2.0W)
Allowable Momentary Power-cut	Less than 20ms
Voltage Endurance	AC1000V-10mA 1 minute (signal and ground)
Insulated Resistance	DC500V-about 10MΩ (signal and ground)
Operation Temperature	0~50°C
Storage Temperature	-10~60°C
Ambient Humidity	20~85% (Non-condensing, dry bulb)
Vibration Resistance	10~25Hz (X,Y,Z directions for 30 minutes 2G)
Interference Rejection	Noise voltage : 1000Vp-p
Atmosphere	Free of corrosive gas
Protect Configuration	IP65F

Note : "-S" stands for internal timer and RS-485
